-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cappelli in view of Busch.

Cappelli discloses providing a shell (12) with a recess (13) formed therein, disposing various sheet members (16, 18, 20, 22) with colorings to match the iris within the recess, disposing a lens (14) within the recess and heating the shell, lens and sheet members to secure them within the recess—see column 4, lines 1-16. Essentially, the primary reference fails to teach employing a sheet with veins provided therein into the recess. Busch teaches forming an artificial eye wherein the shell portion is completed by the painting thereon of vein lines—see column 2, lines 48-53. It certainly would have been obvious to one of ordinary skill in the art to make one of the sheet members of the primary reference with a veined appearance based on the teachings of Busch to more realistically simulate a natural eye. Busch also shows employing various sheet members (8, 10, 12-15) to make the iris and various colorants (9, 11 and 16-20). Also, note that lens body 2 in Figure 4 of Busch has a recess 6 in which pupil material 7 is applied, such meeting instant claims 2 and 3.
